

110 West 34<sup>th</sup> St

April 6<sup>th</sup>

Dear doctor,

I have seen and  
admired Mr. Sabine's work  
extremely, indeed have  
had a species of rap pride  
in it, I wish I could know  
of some position at present  
open for her. It is certain  
that if in any way ~~you~~  
she could arrange to live  
and work in New York,  
she would win recognition  
among a great many people  
could she not come over  
and have a talk with me?  
There are so many things  
which can only be brought  
out in a viva voce  
discussion, I

Should be very glad to make  
her acquaintance. Her "model"  
made a great impression  
at the Neurological Society  
when Mr. Barker exhibited  
it there -

Sincerely yours  
Mary Putnam Jacobi
